

This is a high-risk investment and you should not expect to be protected if something goes wrong. Do not invest unless you are prepared for a substantial or total loss due to the volatile nature of crypto assets.

## Notice to UK token investors

The Financial Conduct Authority (FCA) in the UK considers investment in any cryptocurrency or token high risk, due to the potential for losses.

What are the key risks?

1. You could lose all the money you invest.
2. The performance of most cryptoassets/tokens can be highly volatile, with their value dropping as quickly as it can rise. You should be prepared to lose all the money you invest in cryptoassets.
3. The cryptoasset market is largely unregulated. There is a risk of losing on investment in cryptoassets you purchase due to risks such as cyber-attacks, financial crime and firm failure.
4. You should not expect to be protected if something goes wrong.
5. The Financial Services Compensation Scheme (FSCS) doesn't protect this type of investment because it's not a 'specified investment' under the UK regulatory regime – in other words, this type of investment isn't recognised as the sort of investment that the FSCS can protect.

Learn more by using the FSCS investment protection checker:

<https://www.fscs.org.uk/check/investment-protection-checker>

6. You may not be able to sell your investment when you want to?

There is no guarantee that investments in cryptoassets can be easily sold at any given time. The ability to sell a cryptoasset depends on various factors, including the supply and demand in the market at that time.

7. Operational failings such as technology outages, cyber-attacks and comingling of funds could cause unwanted delay and you may be unable to sell your cryptoassets at the time you want.

## 8. Cryptoasset investments can be complex

Investments in cryptoassets can be complex, making it difficult to understand the risks associated with the investment. We strongly recommend you do your own research before investing in AQLA token.

## 9. Financial Advice

No financial advice has been offered by Aqualibre or its advisors and team and you must seek independent advice when making considerations for investment regarding this project.

## 10. Affordability

Always consider your financial position before investing. Responsible investing within your means should always be considered before you make any commitment.

## 11. Cool-Off Period

Changed your mind? No problem, you have a 24 hour cooling off period to consider the investment.
